MONDAY, March 12-P. M.

With less excitement than was exhibited during the past week, the stock market this morning, with a few exceptions, presented a strong aspect, the Western shares being especially strong. Central had rather less preminence in the transactions than of late, and was governed almost entirely by the varying rumors from Albany in regard to the fate of the Toll bill. The opinions of various parties there who might be sup-posed to be well informed of the chances, and in a posion to give an opinion which might be relied upon, are directly in conflict, and it is evident that there are infinences at work, for and sgainst the bill, the effect of which cannot be calculated, and that, consequently, no ene can form a decided opinion as to the result. The ammering of the stock to-day resulted in a decline of 1 P cent, under sales of about 7,000 shares registered. The bear jobbers made a strong de nonstration upon it, hoping to influence sympathetically the remainder of the market. One of the Directors had a large lot transferred to him to-day, which he bought under the belief that the stock is selling below its intrinsic value, even if the Toll bill passes. A Senator who was in town to-day stated that no bill but that introduced by Mr. Sessions could pass the Senate. Pacific Mail was quiet, but firm, selling at 93%, seller sixty. In Hudson River and Reading the transactions were limited, but quotations were maintained. The Western shares were nearly all active, especially Rock Island, in which transactions add up nearly 4,000 shares, wish a firm market. Galena was also firm, selling up to 591. In Illinois Central there was quite an active demand, partly on foreign account, at an improvement of 1 per cent. The latest accounts from London show an improving market, and the amount of stock on the street here is decreasing. Michigan Central was in good demand, partly to cover short centracts, and closed at about Saturday's prices. The reported earnings of the Western roads for the first week of March, showing an increased traffic in very case but one, has stimulated more movement in we shares of such companies as appear to be unreasonably depressed. The speculation is based upon the anticipation that the results of the first week are only the forerunners of a largely increased business during the Spring. At the Second Board the market was not active, but was generally without change of importance. Central was 741, at the close of the oa. In the Bond market the transactions were not large excepting in Missouri's, of which \$165,000 were sold, the quotations advancing to 824, closing at The advices from the Missouri Legislature indicate but a moderate issue, if any, in further aid of railroads Virginia's sold at 94 and Tennessees at 914. Government Stocks were in better demand and higher. Coupon 5s, 1874 were sold privately at 102. The registered bonds are held at 1024. In Railroad bonds there was not much done, but prices were very firm. Michigan Central 8s Sinking Fund sold at 951 and closed at that bid. These bonds carry 4 P cent interest, due 1st April, and are a first lien on the road. Erie Seconds sold at 92 ex. interest and the Thirds at 764. Illinois Central Bonds were very firm. The closing quotations were: Virginias, 941 295; Missouri 6s, 82 3 821; Canton Company, 28 2 201; Cumberland Coal Company, Preferred 151 151; New-York Central Railroad, 73 273); Erie Railroad, 91@91; Hudson River Railroad, 391@391; Harlem Railroad, 91@91; Harlem Preferred, 341@ 341; Reading Railroad, 42@421; Michigan Central Railroad, 391 @ 40; Michigan Southern and Northern Indisua Railroad, 7128; do. There is a fair amount of business doing in Foreign Bills for the Wednesday steamer, and rates are unchanged. The supply of first-class Sterling at 1087 1082 is large, but of the lower grades at 1081 at 1081 th eapply is restricted. France are lower and dull; we quote 5.18] @5.15.

The Bank Statement shows an unexpected and dangerous increase in the line of loans. The wants of the commercial world require no such expansion of facilities, and it has arisen from the desire of bank managers to earn larger cividends, and has mostly gone to foster the speculation in the stock market of last week, and to aid imperiors in paying duties upon our large imports. On the other hand, the loss of specie is larger than was anticipated by any one; but this is of less importance, as the California arrival has made up this loss, and the Sub-Treasury will disburse largely again the week. The deposit item does not sympathize with the rest of the statement, showing but a small increase, when by the movement the deposits should have shown an increase of about a million. The expansion by the banks bus been very general, although mostly confined to the larger institutions. Of the whole number, thirty-two show an expansion. The largest amount is by the American Exchange, about \$550,000, Commerce about \$450,000, Merchante about \$200,000, and Manhattan about \$400,000.

Money is rather more abundant to-day on leading ollaterals, at 526 P cent; and some bank officers were in the street to-day, endeavoring to lend upon Government and State stocks, at 5 P cent. Paper is without change, but the tendency is downward. The banks are taking all the good names offering under four months maturity. There is a good demand for Treasury Notes, and large sales of 6 P cents have been made at ! P cent prem. The North Atlanti: Steamship Co. advertise the Adriatic for Southampton and Havre, under the command of the popular Capt. Jo. Comstock. We have heard that a party representing the French Government have been in negotiation with the North Atlantic Co. for all their ships for the purpose of forming a line between this port and Cherbourg, the French Government wishing to make that a great commercial port, as it is already a great naval depot. The Board of Directors of the Merchants' and Traders' Bank having passed a resolution to increase the capital stock to \$500,000, stockholders are now entitled to subscribe at par in the proportion of one share to every two shares of old. Subscriptions ar payable on the lat of May next. At auction to-day 382,000 Milwaukee and Chicago 8 & cent Third Mortgage Bonds sold at 1 V cent.

BAMAGES FOR SHOOTING A MAN.

Wm. Cuff agt. Robert Martin.

This action was brought to recover damages for injuries to the plaintiff by being shot with a pistol in the hands of the defendant. It appeared that on the 6th of July, 1888, the plaintiff was standing at the entrance to his residence in Ninth street, and the defendant came along and fired off a platol close to his head, canely a wound on the side of his neck, and severely injuring him. The wound was probed by physicians who averred their belief that the weapon was loaded with ball. The hall was never found, however, as the physicians and it would endanger the plaintiff's life to probe the wound any further. The defendant set up that it was an accident, and that as there was no intent to injure the plaintiff, the defendant could not be held responsible in damages. Verdict for plaintiff #990. Van Buren and Sekras for plaintiff; Charles Sepancer for defendant.

UREAT REAL-ESTATE DECISIOS—CHURCH REPUBLA-TION.

Some years since a stranger called on Henry C. Bowen (firm of Bowen, McNamee & Co.), of this city, and in vi of him to purchase the Irish Presbysteria Church in Canal street, corner of Green. The congregation, he said, desired to sell out and move up-town. Mr. Rougen replied that he did not wish to purchase any more real extate, fittat the ununit solicitation of the arranger, consented to hear from his lips the particulars in regard to dimensions, location, etc. The price at which the property was held was believed to be a fair one, but certain parties is the neighborhood, desiring a better bargain, held off, waiting for the Trustees to come down to their figures. As soon as the price fixed by the Trustees was named to Mr. Bowen, he decided at once to make the purchase. The congregation and the Board of Trustees appeared to be quite satisfied. Mr. Bowen placed the matter in the hands of his automory, Wm. M. Evatts, each, to see that the papers were properly drawn, and that the title was a good cise. Mr. Evarts informed the Trustees what steps were necessary in order to conform to the requirements of the statute. They were:

First: To call a meeting of the society, who must yote to make the sale and authories the Trustees to act.

Scoond: The Trustees after such vote of the Society, must then meet and by yote authories the Frusteet of the Board to take the steps necessary to complete the sale.

CITY ITEMS.

That the pen is mighty will be conceded when a cer-

tain work of art, executed with that little instrument, now on exhibition at Williams & Stevens's, Broadway, is examined. It is a large picture, about four feet by two, representing American national portraits, State costs-of-arms, and so forth, with a plenitude of arabesque ornate decoration that is positively astonishing. We are told that of its kind it is unequalled anywhere, which we can readily believe. The central figure is a portrait of Washington, most spiritedly drawn and ex-ecuted, and giving the effect of a fine steel engraving-This minute elegance as well as breadth of expression pervades every portion of this work throughout its igures, symbols, and architectural like adoraments. The artist has been two whole years laboriously engaged on it. His history is curious: years ago he was pastry-cook at the Delmonico, and was noted for the supremacy of blown-up omlets. Then he took to art;

nd was to remarkable for the eteadiness and elegance of his band, that on going to Europe he found employment nader more than one Government, that of the Pope included; but his democratic ideas, and the revulsions after 18.18, forced him to leave Rome, and return to this country. This work has been executed for James Meyer, esq., a gentlemen of groat taste and liberallty, agent of the house of Mamm. It has excited much admiration from Mr. Everett, and others interested in the Mount Vernon fund. If engraved, it will prove the most comprehensive historical art ilfustration yet designed, for it has the heads of all the Presidents, as well as two, or three, or four men baside politicians (happy country, that calls so many mea great outside of politics!-the world does move), many political dates and facts interspersed with art-radiations, with much more curious and beautiful detail than we can describe. Hung up in public places, schools, and private houses, it would stimulate patriotism.

REAL ESTATE MOVEMENTS. -In our article upon movements in real estate, published on Friday last, an error crept in, in reward to the rent of store No. 82 Breadway. It has rented up to last May from the time it was built, five or six years ago, for \$14,800. Part of the leases then expired. For the present year, ending 1st of May, it has been leased for \$12,000. A good part of the building has been let for next year for over \$19,000. Mr. St. John's building, the next door above, which is only 50 feet deep by 30 front, sold the other day for \$65,000. In speaking of the depreca on of property on the west side of the City Hall Park, we referred to property on the side streets only, and not to Broadway, where it is more valuable to-day than it ver bas been before.

THE MUNICIPAL EXPORTION CASE.—The following is the affidavit upon which the case of extertion, in the Street Commissioner's Office, which we published yesterday, is founded:

Street Commissioner's Office, which we published yesterday, is founded:

City and County of New-York, a:

Jacob R. Shaight of the said city, being duly ewern, deposes and says—that on or about May 26th, 1859, he was employed by the Inspector of Sidowalks, of which Alex. Ward was, and is now, the proper officer, and which office is attached to the office of Street Commissioner, of the said city, to paint, letter and put up all the signs necessary for the said city.——And this deponent further says that on the 26th day of May 1859, the above Alex. several years, is again to be put in the European pas-senger business. On the 14th of April she will leave this port for Southampton and Havre, under command of the popular Capt. Comstock, and every six weeks thereafter throughout the Summer. Capt. Comstock, who took her out on her late trial trip, and tested her seagoing qualities thoroughly, pronounces her the fastest and safest ocean steamer affoat. Her cabin ac-commodations are unsurpassed for comfort and elegance, and the North Atlantic Company, to whom she belongs, will spare no expense to make her popular with the traveling public. Mr. Wm. H. Wickham is e agent, to whom applications for freight or passage should be made.

THE NEW WASHOE SILVER MINES .- We have been shown by Messrs. L. F. Lawrence & Co., of this city, specimens of ore and smelted metal from the newly discovered Washoe Silver Mines, in California, which were transmitted to them by W. F. Wilson & Co., of San Francisco. The larger of the specimens shows the sulphurets of iron to a slight degree, and is said to represent the general character of the main "lead." The smaller pieces show native silver, and are very rich. These are from the Comstock lead, or as it is now called the "Ophir Company's lead." Accompanying the specimens is a certificate of assay, by H. Harris & Co., staing them to contain 25 per cent of silver, 50 per cent of lead, and 25 per cent of rock and base metals. Means. Sather & Church speak of these wonderful mines in the following terms; "The accounts of the silver mines of Washoe in Carson Valley, continue to astound the people of San Francisco. Prudent men, who were never known to venture in wild speculations, have made large investments; these mines are said to be the richast ever known in the world, and we have reason to think large amounts in silver bars will be remitted during the next Sommer and Fall. If the one hundredth part of the reports as the extent and richness of these mines are true, they are destined to create as great an excitement throughout the world as the first discovery of gold in California." The ore which has reached San Francisco has actually yielded from \$3,000 to \$8,000

MURDER ON THE HIGH SEAS-A CAPTAIN KILLS HIS FIRST MATE.-J. S. McMicken, United States Consul at Acapulco, has sent home Capt. Mallet, of the ship John Cottle, on the charge of killing John H. Perry, the first mate of the vessel, on the 8th of February last, while she was on her voyage from New-York to Acapulco. It appears from the depositions taken before the Consul that there was much ill-feeling between the captain and the mate, produced partially by the insubordinate conduct of Mr. Perry, and partially by the excited imagination of the captain, which at times bordered on insanity. The facts of this case ap-pear to be briefly as follows: The ship John Cottle sailed from this port on Aug. 27, 1859, with coal for the Pacific Steam Navigation Company. On the afternoon of Feb. 8 there was an altereation between Capt. Mallet and the first officer, Mr. Perry, which put the captain in a state of excitement, amounting, in the opinion of those on deck at the time, to a frenzy. The nate went below to the cabin, but came up again, and went toward the captain, who was standing nearly amidships, when the latter suddenly drew a pistol, and fired four times at the mate, each ball taking ffect; one ball lodged in the throat, near the chin. ne entered his side, a third lodged in his ribs. nd a fourth went through his wrist, breaking his arm. Of these wounds, the unfortunate man died in a few hours. The Captain then, meeting the second mate, said to him: "There Mr. Ryan, I have put four builets in him, but I had to do it." The Captain subse-quently called the men aft, said he had shot the mate in self-defense and hoped the crew would stand by him. The crew said they would if he would give up his arms, this he consented to do, and the other persons on board, conceiving the Captain to be deranged, put him in irons. The vessel arrived at the port of Acapulco two

days after this unfortunate occurrence, and the Capte. was put into the custody of the American Consul, who yesterday morring by the steamer Atlantic, together with two witnesses. The prisoner is a good-looking man, about 20 years of age, but has a somewhat wild look in his eyes. His friends have been noticied by telegraph of his arrival.

MERTING OF TRON-MOULDERS. -Last night a most ing of the Iron-Monicers of New-York and vicinity was held at Humboldt Hall, in Porsyth street. At a meeting held a few nights previous, it was residved by about two hundred moulders to form a Protective Union. A Committee was then appointed to draft a Constitution and By-Laws. Last night that Commit'ee made their report. They recommend the adopwhich governs the Philadelphia Union. About the 10th of February a National Convention of Mouldon was held at Albany, at which twenty-two different States were represented. It was there recommended that subordinate societies should be formed in all cities! and large towns, subject to the National Union, for metual protection. This recommendation is now being acted upon, and seems to meet the views of the mouldders of this city, as there was much enthusiasm masifeeted last evening. In some of the neighboring cities the moulders have been forced to strike for an iscrease of wages, and it is thought that the formation of there Unior's throughout the land will be beneficial in all such emergencies. A large number of these! present at the two meetings hald here subscribed their names to and became members of the Society.

THE WILL OF JOHN G. BOKER.—The will of the late John G. Beker has been filed in the Sarrogate's office. It provides that his whole estate shall be given to his widow, and, after her death, to his four children. A codicil, however, cuts off his son Walter and his daughter "Mary Ann," the wife of John Dean, from receiving any portion of the estate. A citation kase been issued, returnable April 28. CONSPIRACY TO DEFRAUD.-Antonio Pelletier, &

day or two since, appeared before Justice Osborn, and desired the arrest of S. H. Ackerman, William Jouss, and Don José Perrians, charging them with a conspiracy to defraud. Pelletier alleges that on the lab-day of February he purchased of S. H. Ackerman, who acted as a broker for another person, the bark White Clond. He paid for the vessel the sum of \$5,500, and \$150 to Ackerman for his services as broker. While the bark was in the possession of Pellstier he had herfitted for sea, and seems to have indured some debts to that end, as the Sheriff held certain processes against the vessel. Pelletier then transferred his title to the vessel to Jones, taking from him a power of attorney authorizing him to dispens of the bark as he should see fit. Perletier now alleges that Jones has executed a bill of sale to Albert B. Milibridge, selling to him the bark with the intent to defrand him (Pelletier) out of his property. He also alleges that Ackerman and Don José Perrians are interested in the conspiracy, and that the latter is furnishing the money to equip the vessel for sea, and thus place her beyond the reach of complainant. A warrent was issued for the acres of the parties accused, and yesterday Jones was taken into custody by Officer McCord. On being brought before the Magistrate he was held for examination. The other alleged conspirators have not yet been arrested.

JUVENILE INCENDIARY,-The premises, No. 133 West Forty-ninth street, owned by Francis W. Barron, and occupied by a man named Innes, have been set on fire four times within the last ten days. In each case the fire was discovered on the second floor, and there was no doubt of its being the work of aniacendiary. On Saturday morning the fourth fire was discovered in the building, and suspicion attached to a son of Mr. Innes, named Edward, aged 13 years. Le was therefore arrested, and after having denied the fact for a long time, at length confessed the crime. He owned that he had kindled the last fire, and said that his only object in doing so was to get the fire esgines there, and see them work.

There are various rumors in regard to the previous fires, some of them attaching considerable mystery to the incendiary attempts. A servant girl in the house avers that on one occasion she hastened to the rescue of Edward and a younger brother, who were sleeping in a room where the fire occurred. Just as she was e ing the room, she observed a man dressed in black, wearing a glazed cap, rush along the hall, put a short ladder to the source in two root, and never the disappear on the roof. Another lady says she saw a man on the roof, and states that he ran along the tops of two or three houses, and then disappeared. Fire-Marshal Baker has been investigating the matter, and it was he who caused the arrest of Edward. The lad was committed for further examination by Justice Connolly. It is said that the child is deficient in intellect, although possessing a shrewd look. He is represented as a rather bad boy, whose conduct warranted his dismissal from the Public School. The probability is that he is the author of all the alarms, which he occasioned simply to gratify his desire for expitement, and to see

ALLEGED OUTRACE .- On Thursday last, a girl ALLYGED OUTRACE.—On Thursday last, a gird manded Catharine Hearn, while passing through Elizabeth street, was accosted by a man who asked her if she was in wast of a situation.
